```
graph TD; 20[Identify Streams] --> 22[Buffer Streams]; 22 --> 24[Select Stream]; 24 --> 26[Present Selected Stream]; 26 --> 28[Buffer Streams]; 28 --> 30[Select Stream];
```

The flowchart illustrates a video stream selection method. It begins with a box labeled "Identify Streams" (20), which leads to a box labeled "Buffer Streams" (22). From "Buffer Streams", the flow proceeds to a box labeled "Select Stream" (24). From "Select Stream", the flow proceeds to a box labeled "Present Selected Stream" (26). A feedback loop is shown where the output of "Present Selected Stream" (26) is fed back into the "Buffer Streams" (22) box, and another feedback loop is shown where the output of "Present Selected Stream" (26) is fed back into the "Select Stream" (24) box.
